Subject Index

A

Accurate acrylic resin temporary restorations (Kaiser), 158
Acid-etch/composite resin restoration of fractured anterior teeth: part II (Fuks and Shapira), 637
  etched dentin, retentive ability of (Torney), 169
Acquired maxillary defects, obturator prosthesis design for (Desjardins), 424
Acrylic resin based, processing, for removable partial dentures on hydrocolloid cast (Simmons et al.), 692
  copings: adjunct to fixed restorative dentistry (Crispin), 632
  crowns, temporary, three currently used, histologic evaluation of tissue response to (MacEntee et al.), 42
  temporary restorations, accurate (Kaiser), 158
  veneers, thermosetting, spherical powder for retaining (Tanaka et al.), 295
Adaptation, marginal, and microleakage of composite resin restorations (Lüscher et al.), 409
Adjustments, articulator, using transfer vise (Tradowsky), 47
Age changes in human alveolar mucosa and bone, significance of (Nedelman and Bernick), 495
Air flow and intelligibility of speech of normal speakers and speakers with prosthodontically repaired cleft palate (Schneiderman and Mann), 193
Alveolar mucosa and bone, human, significance of age changes in (Nedelamn and Bernick), 495
  under complete dentures, histochemical and histopathologic studies of (Razek and Shaaban), 29
Amalgam carrier, back-action (Casey), 520
  pin-retained, and composite resin cores, comparison of (Fujimoto et al.), 512
Anatomic-type artificial teeth, arrangement of, into balanced occlusion (Jordan), 484
Anatomy of smile (Matthews), 128
Anchor attachments, Zest, parallelism of preparation for method of verifying (Jaggers), 230
Anterior guidance—key to successful occlusal treatment (Broderson), 396
  intermediate restoration, single, fabrication of (Nayyar and Edwards), 574
  restorations, marginal failure in (Cunningham and Williams), 522
  rests for maxillary removable partial dentures (Berg and Caputo), 139
  teeth, fractured, acid-etch/composite resin restoration of: part II (Fuks and Shapira), 637
  pin-retained composites for splinting (Schnepper), 162
  tooth display, kinetics of (Vig and Brundo), 502
Arrangement of anatomic-type artificial teeth into balanced occlusion (Jordan), 484
Articulation, Hanau's Laws of, and Hanau Quint, reevaluation of (Levin), 254
Articulator(s) adjustments using transfer vise (Tradowsky), 47
  one face-bow adapts to three (Loos), 469
  through years. Part I. Up to 1940 (Mitchell and Wilkie), 330
  through years. Part II. From 1940 (Mitchell and Wilkie), 451
Artificial teeth, anatomic-type, arrangement of, into balanced occlusion (Jordan), 484
Assessment, in vitro, of marginal leakage of six enamel sealants (Jensen and Handelman), 304
Attachment(s) fixation of overdenture: part II (Mensor), 16
  Zest anchor, parallelism of preparations for, method of verifying (Jaggers), 230

B

Back-action amalgam carrier (Casey), 520
Balanced occlusion, arrangement of anatomic-type artificial teeth into (Jordan), 484
Bar, mesostructure, rigidity of implant denture substructure with (Bodine and Vakay), 88
Base(s), acrylic resin, processing, for removable partial dentures on hydrocolloid cast (Simmons et al.), 692
  completed, for removable dentures, (Graser), 232
  denture, technique for finishing and polishing (Welker et al.), 240
  polymers, denture, creep and hardness testing of some (Stafford and Huggett), 682
  resins, denture, two heat-curing, bonding of plastic teeth to (Morrow et al.), 565
  stabilized record, combining final impressions with maxillomandibular relation records in (Helft et al.), 135
Blood pressure and pulse rate response, human, to racemic epinephrine retraction cord (Pelzner et al.), 287
Bonded porcelain, shade of, study of various factors influencing (Barghi and Richardson), 282
Bonding of plastic teeth to two heat-curing denture base resins (Morrow et al.), 565
Bone and mucosa, human alveolar, significance of age changes in (Nedelman and Bernick), 495
Book review(s), 118, 357
Bruxing patient, chronic, metal posterior teeth for (McArthur), 578

C

Canada, extracoronal removable partial denture service in (Sykora), 37
Cancer, head and neck, psychological problems of patients with (Turns and Sands), 68
Carcinomas, cell, persistent unresectable squamous, delivering surface irradiation to: prosthodontic solution (Sheiner and Ager), 551
Carrier, amalgam, back-action (Casey), 520
Carving dental restorations (Wiland), 582
Cast crowns, simulated, effect of ultrasonic instrumentation of retention of (McQuade et al.), 640
  hydrocolloid, processing acrylic resin bases for removable partial dentures on (Simmons et al.), 692
  working, soft-tissue (Balshi and Hancock), 349
Castings, dental, radiographic technique for detection of internal defects in (Pascoe and Wimmer), 150
  removable partial denture, method of stabilizing, during clinical and laboratory procedures (Lorton), 344
  radiographic evaluation of porosities in (Lewis), 278
  failure of, during service (Lewis), 147
Cathode holder, simple, for electroplating copper-band impressions (Grajower and Stern), 285
Cell carcinomas, persistent unresectable squamous, delivering surface irradiation to: prosthodontic solution (Sheiner and Ager), 551

January, pp 1-124; February, pp 125-250; March, pp 251-364; April, pp 365-480; May, pp 481-594; June, pp 595-722.

Cement(s) beneath complete crowns, film thickness of (Hembree et al.), 533
dowel length, diameter, and design, effects of, retention of endodontic dowels: (Standlee et al.), 401
polycarboxylate, punch shear strength of (Santos et al.), 420
Centric relation, laminagraphic study of mandibular condyle position when recording (Williamson), 561
Ceramic-metal restorations (Abbott), 293
Changes, age, in human alveolar mucosa and bone, significance of (Nedelman and Bernick) 495
dimensional, comparison of fluid resin and compression molding methods in processing (Hardy), 375
occlusal and dimensional, in fluid resin dentures (Antonopoulos), 605
Characteristics of condylar path in internal derangements of TMJ (Farrar), 319
Chloride, vinyl, concentrations in maxillofacial prosthetics laboratories (Guerra and Kronoveter), 200
Chrome-cobalt removable partial denture frameworks, Thompson dowel-rest system mofified for (Becker et al.), 384
Chronic bruxing patient, metal posterior teeth for (McArthur), 578
Clasping system for unilateral distal-extension removable partial dentures, new (Garver), 268
Cleft palate, prosthodontically repaired, air flow and intelligibility of speech of normal speakers and speakers with (Schneiderman and Mann), 193
Clinical and laboratory procedures, method of stabilizing removable partial denture castings during (Lorton), 344
comparison of masticatory performance and electromyographic activity of patients with complete dentures, overdentures, and natural teeth (Rissin et al.), 508
significance, removable partial denture research and its (Cecconi), 203
Cobalt-chrome removable partial denture frameworks, Thompson dowel-rest system modified for (Becker et al.), 384
Color and its application in maxillofacial prosthetics (Fine), 188
and texture, skin reproduction of, in facial prostheses for Negro patients (Aina et al.), 74
Coloring facial prostheses, new method for (Fine et al.), 643
Combination impression and occlusal registration technique for extension-base removable partial dentures (Akerly), 226
Combining final impressions with maxillomandibular relation records in stabilized record bases (Helft et al.), 135
Comparison, clinical, of masticatory performance and electromyographic activity of patients with complete dentures, overdentures, and natural teeth (Rissin et al.), 508
in vivo, of composite resin and its radiopaque counterpart (Osborne et al.), 406
of fluid resin and compression molding methods in processing dimensional changes (Hardy), 375
of pin-retained amalgam and composite resin cores (Fujimoto et al.), 512
Complete crowns, film thickness of cements beneath (Hembree et al.), 533
denture(s), histochemical and histopathologic studies of alveolar mucosa under (Razek and Shaaban), 29
masticatory performance of, occlusal plane orientation and (Carey), 368
occlusion, evaluation of use of face-bow in (Thorp et al.), 5
overdentures, and natural teeth, clinical comparison of masticatory performance and electromyographic activity of patients with (Rissin et al.), 508
immediate dentures, interim, for patient wearing removable partial dentures (Casey), 466
mandibular subperiosteal implants for edentulous mandibles (Garefis), 670
maxillary denture, impression technique for (Cupero), 108
Completed bases for removable dentures (Graser), 232
Composite(s), pin-retained, for splinting anterior teeth (Schnepper), 162
resin(s) and its radiopaque counterpart, in vivo comparison of (Osborne et al.), 406
cores, comparison of pin-retained amalgam and (Fujimoto et al.), 512
eight, scanning electron microscope investigation of in vivo performance of (Flynn), 529
evaluation of viscosity-reducing agent for (Metzler and Chandler), 527
multilayer and repaired, strength of (Boyer et al.), 63
restoration(s), microleakage and marginal adaptation of (Lüscher et al.), 409
of fractured anterior teeth, acid-etch: part II (Fuks and Shapira), 637
Compression molding and fluid resin methods, comparison of, in processing dimensional changes (Hardy), 375
Computer-graphic representation of mandibular movement in three dimensions. Part I. Horizontal plane (Roedema et al.), 378
Concentrations, vinyl chloride, in maxillofacial prosthetics laboratories (Guerra and Kronoveter), 200
Condylar path, characteristics of, in internal derangements of TMJ (Farrar), 319
Condyle position, mandibular, when recording centric relation, laminagraphic study of (Williamson), 561
Considerations, practical, in iontophoresis of fluoride for desensitizing dentin (Gangarosa and Park), 173
Constructing hollow-bulb provisional obturator, rapid technique for (Beder and Todo), 237
Continuously, should dentures be worn (Tautin), 372
Copings, acrylic resin: adjunct to fixed restorative dentistry (Crispin), 632
Copper-band impressions, simple cathode holder for electroplating (Grajower and Stern), 285
Cord, racemic epinephrine, retraction, human blood pressure and pulse rate response to (Pelzner et al.), 287
Core(s), composite resin, comparison of pin-retained amalgam and (Fujimoto et al.), 512
post restorations, fractured, procedure for repairing (Samani and Harris), 627
technique, multiple (Michnick and Raskin), 622
Counseling and related factors influencing satisfaction with dentures (Guckes et al.), 259
Creep and hardness testing of some denture base polymers (Stafford and Huggett), 682
Crown(s), acrylic resin, temporary, three currently used, histologic evaluation of tissue response to (MacEntee et al.), 42
complete, film thickness of cements beneath (Hembree et al.), 533
removal technique, safe (Garver and Wisser), 56
simulated cast, effect of ultrasonic instrumentation on retention of (McQuade et al.), 640
Cusp height and ridge and groove direction, measurement of, using electrical transducer. Part I: instrumentation (Jaarda et al.), 678

D

Defects, internal, in dental castings, radiographic technique for detection of (Pascoe and Wimmer), 150
maxillary, acquired, obturator prosthesis design for (Desjardins), 424
Delivering surface irradiation to persistent unresectable squamous cell carcinomas: prosthodontic solution (Sheiner and Ager), 551
Denar pantograph as transfer-bow, procedural problems in using (Beck et al.), 166
Dental castings, radiographic technique for detection of internal defects in (Pascoe and Wimmer), 150

Dental—Cont'd
malpractice: enormous and growing problem (Collett), 217
restorations, carving (Wiland), 582
student as technician: to what degree (Weintraub), 459
treatment and diagnosis, Sjogren's syndrome (Barker et al.), 536
Dentin, acid-etched, retentive ability of (Torney), 169
desensitizing, practical considerations in iontophoresis of fluoride for (Gangarosa and Park), 173
Dentists, recent legal decisions and their effects on (Gamer), 106
Denture(s) base(s) polymers, creep and hardness of some (Stafford and Haggett), 682
resins, heat-cutting, bonding of plastic teeth to two (Marrow et al.), 565
technique for finishing and polishing (Welker et al.), 240
be worn continuously, should (Tautin), 372
castings, removable partial, failure of, during service (Lewis), 147
method of stabilizing, during clinical and laboratory procedures (Lorton), 344
radiographic evaluation of porosities in (Lewis), 278
complete, histochemical and histopathologic studies of alveolar mucosa under (Razek and Shaaban), 29
immediate, interim, for patient wearing removable partial dentures (Casey), 466
occlusal plane orientation and masticatory performance of (Carey), 368
overdentures, and natural teeth, clinical comparison of masticatory performance and electromyographic activity of patients with (Rissin et al.), 508
design, removable partial, for few remaining natural teeth (Bolouri), 346
dies, fixed partial, simplified technique for trimming (Shames), 697
fluid resin, dimensional and occlusal changes in (Antonopoulos), 605
frameworks, chrome-cobalt, removable partial, Thompson dowel-rest system modified for (Becker et al.), 384
immediate, effect of, on oral motor skill and speech (Chierici et al.), 21
implant, rigidity of substructure with mesostructure bar (Bodine and Vakay), 88
mandibular treatment, technique for fabricating (Tupac), 110
maxillary, complete, impression technique for (Cupero), 108
occlusion, complete, evaluation of use of face-bow in (Thorp et al.), 5
partial, unilateral distal-extension removable, new clasping system for (Garver), 268
removable, completed bases for (Graser), 232
partial, distal-extension, stresses from loading (Craig and Farah), 274
dual-path design for (King), 384
extension-base, combination impression and occlusal registration technique for (Akerly), 226
extracoronal, service in Canada (Sykora), 37
inconspicuous retention for (King et al.), 505
interim complete immediate dentures for patient wearing (Casey), 466
maxillary, anterior rests for (Berg and Caputo), 139
on hydrocolloid cast, processing acrylic resin bases for (Simmons et al.), 692
research and its clinical significance (Cecconi), 203
satisfaction with, counseling and related factors influencing (Guckes et al.), 259
Derangements, internal, of TMJ, characteristics of condylar path in (Farrar), 319
Desensitizing dentin, practical considerations in iontophoresis of fluoride for (Gangarosa and Park), 173
Design, cement, dowel length, diameter, and, effects of, retention of endodontic dowels (Standlee et al.), 401
dual-path, for removable partial dentures (King), 392
obturator prosthesis, for acquired maxillary defects (Desjardins), 424
removable partial denture, for few remaining natural teeth (Bolouri), 346
Detection of internal defects in dental castings, radiographic technique for (Pascoe and Wimmer), 150
Diagnosis and dental treatment, Sjögren's syndrome (Barker et al.), 536
Diameter, cement, dowel length, and design, effects of, retention of endodontic dowels (Standlee et al.), 401
Dies, fixed partial denture, simplified technique for trimming (Shames), 697
Dimensional and occlusal changes in fluid resin dentures (Antonopoulos), 605
changes, comparison of fluid resin and compression molding methods in processing (Hardy), 375
Dimensions, three, computer-graphic representation of mandibular movement in. Part I. Horizontal plane (Roedema et al.), 3788
Direct fabrication of interlocking endodontic posts (Welsh and Priddy), 115
Direction, ridge and groove, and cusp height, measurement of, using electrical transducer. Part I: instrumentation (Jaarda et al.), 678
Directory, 119, 245, 360, 475, 588, 700
Displacement, mandibular, in survey population, prevalence and magnitude of (Rieder), 324
Display, anterior tooth, kinetics of (Vig and Brundo), 502
Distal-extension removable partial dentures, stresses from loading (Craig and Farah), 274
unilateral, new clasping system for (Garver), 268
Distortion, measurement of—mathematical considerations (Nicholls), 339
Dowel(s), endodontic, retention of: effects of cement, dowel length, diameter, and design (Standlee et al.), 401
length, cement, diameter, and design, effects of, retention of endodontic dowels (Standlee et al.), 401
rest system, Thompson, modified for chrome-cobalt removable partial denture frameworks (Becker et al.), 384
Dual-path design for removable partial dentures (King), 392
Dysfunction-pain syndrome, TMJ, treatment prostheses in (Weinberg), 654
TMJ and muscle, using pantographic tracings to detect (Shields et al.), 80
history of, maximum mandibular opening in patients with and without (Rieder), 441

E

Edentulous mandibles, complete mandibular subperiosteal implants for (Garefis), 670
Editor, through eyes of (Section editors), 1, 125, 151, 365, 481, 595
Effect of ultrasonic instrumentation on retention of simulated cast crowns (McQuade et al.), 640
Elastomeric impression materials, tear strength of (Herfort et al.), 59
Elastomer(s), polyurethane, for facial prostheses (Gonzalez), 179
formulations used for facial prostheses, physical and mechanical behavior of (Gonzalez et al.), 307
Electrical transducer, measurement of cusp height and ridge and groove direction using, part I: instrumentation (Jaarda et al.), 678
Electromyographic activity and masticatory performance of patients with complete dentures, overdentures, and natural teeth, clinical comparison of (Rissin et al.), 508

Electron microscope, scanning, investigation of in vivo performance of eight composite resins (Flynn), 529
Electroplating copper-band impressions, simple cathode holder for (Grajower and Stern), 285
Enamel finish and microleakage (Khera and Chan), 414
sealants, six, in vitro assessment of marginal leakage of (Jensen and Handelman), 304
Endodontic dowels, retention of: effects of cement, dowel length, diameter, and design (Standlee et al.), 401
posts, interlocking, direct fabrication of (Welsh and Priddy), 115
Epinephrine retraction cord, racemic, human blood pressure and pulse rate response to (Pelzner et al.), 287
Etch, acid-, composite resin restoration of fractured anterior teeth: part II (Fuks and Shapira), 637
Etched dentin, acid-, retentive ability of (Torney), 169
Evaluation, histologic, of tissue response to three currently used temporary acrylic resin crowns (MacEntee et al.), 42
of facial prostheses (Jani and Schaaf), 546
of rubber-base impression material (Gunther and Welsh), 95
of use of face-bow in complete denture occlusion (Thorp et al.), 5
of viscosity-reducing agent for composite resins (Metzler and Chandler), 527
radiographic, of porosities in removable partial denture castings (Lewis), 278
Extension-base removable partial dentures, combination impression and occlusal registration technique for (Akerly), 226
Extracoronal removable partial denture service in Canada (Sykora), 37

F

Fabricating mandibular treatment dentures, technique for (Tupac), 110
Fabrication, direct, of interlocking endodontic posts (Welsh and Priddy), 115
of obturator speech prostheses, physiologic recording of soft palate for (Birnbach), 539
of single anterior intermediate restoration (Nayyar and Edwards), 574
posterior intermediate restoration (Nayyar and Edwards), 688
Face-bow in complete denture occlusion, evaluation of use of (Thorp et al.), 5
one, adapts to three articulators (Loos), 469
Facial prostheses, evaluation of (Jani and Schaaf), 546
for Negro patients, reproduction of skin color and texture in (Aina et al.), 74
new method for coloring (Fine et al.), 643
physical and mechanical behavior of polyurethane elastomer formulations used for (Gonzalez et al.), 307
polyurethane elastomers for (Gonzalez), 179
Failure, marginal, in anterior restorations (Cunningham and Williams), 522
of removable partial denture castings during service (Lewis), 147
Federation of Prosthodontic Organizations: Annual Session Report, 1977 (McGivney), 352
Film thickness of cements beneath complete crowns (Hembree et al.), 533
Final impressions, combining with maxillomandibular relation records in stabilized record bases (Helft et al.), 135
Finish, enamel, and microleakage (Khera and Chan), 414
Finishing and polishing denture bases, technique for (Welker et al.), 240
Fixation, attachment, of overdenture: part II (Mensor), 16
Fixed partial denture dies, simplified technique for trimming (Shames), 697
Fixed—Cont'd
restorative dentistry, adjunct to, acrylic resin copings (Crispin), 632
Flow, air, and intelligibility of speech of normal speakers and speakers with prosthodontically repaired cleft palate (Schneiderman and Mann), 193
Fluid resin and compression molding methods in processing dimensional changes, comparison of (Hardy), 375
dentures, dimensional and occlusal changes in (Antonopoulos), 605
Fluoride, iontophoresis of, for desensitizing dentin, practical considerations in (Gangarosa and Park), 173
Force transmission by indirect retainers during unilateral loading (McDowell), 616
Formulations, polyurethane elastomer, used for facial prostheses, physical and mechanical behavior of (Gonzalez et al.), 307
Fractured anterior teeth, acid-etch/composite resin restoration of: part II (Fuks and Shapira), 637
genial tubercles (Goebel), 603
post-core restorations, procedure for repairing (Samani and Harris), 627
Frameworks, chrome-cobalt, removable partial denture, Thompson dowel-rest system modified for (Becker et al.), 384

G

Genial tubercles, fractured (Goebel), 603
Graphic representation, computer-, of mandibular movement in three dimensions. Part I. Horizontal plane (Roedema et al.), 378
Grinding phase of mastication, mandibular path in—review (Yaeger), 569
Groove and ridge direction and cusp height, measurement of, using electrical transducer. Part I: instrumentation (Jaarda et al.), 678
Guidance, anterior—key to successful occlusal treatment (Broderson), 396

H

Hanau('s) Laws of articulation and Hanau Quint, reevaluation of (Levin), 254
Quint and Hanau's Laws of articulation, reevaluation of (Levin), 254
Hard and soft palate, pathosis of (Nelson and Tsaknis), 436
Hardness and creep testing of some denture base polymers (Stafford and Huggett), 682
Head and neck cancer, psychological problems of patients with (Turns and Sands), 68
Heat-curing denture base resins, two, bonding of plastic teeth to (Morrow et al.), 565
Height, cusp, and ridge and groove direction, measurement of, using electrical transducer. Part I: instrumentation (Jaarda et al.), 677
Histochemical and histopathologic studies of alveolar mucosa under complete dentures (Razek and Shaaban), 29
Histologic evaluation of tissue response to three currently used temporary acrylic resin crowns (MacEntee et al.), 42
study of response of masticatory and lining mucosa to mechanical loading in vervet monkey (Fleisch and Austin), 211
Histopathologic and histochemical studies of alveolar mucosa under complete dentures (Razek and Shaaban), 29
History of TMJ dysfunction, maximum mandibular opening in patients with and without (Rieder), 441
Holder, simple cathode, for electroplating copper-band impressions (Grajower and Stern), 285
Hollow-bulb provisional obturator, rapid technique for constructing (Beder and Todo), 237

Horizontal plane, computer-graphic representation of mandibular movement in three dimensions. Part I (Roedema et al.), 378
Human alveolar mucosa and bone, significance of age changes in (Nedelman and Bernick), 495
blood pressure and pulse rate response to racemic epinephrine retraction cord (Pelzner et al.), 287
Hydrocolloid cast, processing acrylic resin bases for removable partial dentures on (Simmons et al.), 692
Hyperbaric oxygenation: prosthodontic responsibilities (Young and Bump), 100

I

Immediate dentures, effect of, on oral motor skill and speech (Chierici et al.), 21
interim complete, for patient wearing removable partial dentures (Casey), 466
surgical stent prosthesis for maxillary resection (Birnbach), 447
Implants, subperiosteal, complete mandibular, for edentulous mandibles (Garefis), 670
Impressions, copper-band, simple cathode holder for electroplating (Grajower and Stern), 285
final, combining with maxillomandibular relation records in stabilized record bases (Helft et al.), 135
materials, elastomeric, tear strength of (Herfort et al.), 59
and occlusal registration technique, combination, for extension-base removable partial dentures (Akerly), 226
technique for complete maxillary denture (Cupero), 108
Implant denture substructure, rigidity of, with mesostructure bar (Bodine and Vakay), 88
Impression material, rubber-base, evaluation of (Gunther and Welsh), 95
Inconspicuous retention for removable partial dentures (King et al.), 505
Indirect retainers, force transmission by, during unilateral loading (McDowell), 616
Instrumentation, measurement of cusp height and ridge and groove direction using electrical transducer. Part I (Jaarda et al.), 678
ultrasonic, effect of, on retention of simulated cast crowns (McQuade et al.), 640
Intelligibility of speech of normal speakers and speakers with prosthodontically repaired cleft palate, air flow and (Schneiderman and Mann), 193
Interim complete immediate dentures for patient wearing removable partial dentures (Casey), 466
Interlocking endodontic posts, direct fabrication of (Welsh and Priddy), 115
Intermediate restoration, single anterior, fabrication of (Nayyar and Edwards), 574
posterior, fabrication of (Nayyar and Edwards), 688
Internal defects in dental castings, radiographic technique for detection of (Pascoe and Wimmer), 150
In vitro assessment of marginal leakage of six enamel sealants (Jensen and Handelman), 304
In vivo comparison of composite resin and its radiopaque counterpart (Osborne et al.), 406
Iontophoresis of fluoride for desensitizing dentin, practical considerations in (Gangarosa and Park), 173
Irradiation, surface, delivering, to persistent unresectable squamous cell carcinomas: prosthodontic solution (Sheiner and Ager), 551

K

Kinetics of anterior tooth display (Vig and Brundo), 502

L

Laboratories, maxillofacial prosthetics, vinyl chloride concentrations in (Guerra and Kronoveter), 200
Laboratory and clinical procedures, method of stabilizing removable partial denture castings during (Lorton), 344
Laminagraphic study of mandibular condyle position when recording centric relation (Williamson), 561
Laws of articulation, Hanau's, and Hanau Quint, reevaluation of (Levin), 254
Leakage, marginal, of six enamel sealants, in vitro assessment of (Jensen and Handelman), 304
Legal decisions, recent, and their effects on dentists (Garner), 106
Length, dowel, cement, diameter, and design, effects of, retention of endodontic dowels (Standlee et al.), 401
Lining and masticatory mucosa, histologic study of response of, to mechanical loading in vervet monkey (Fleisch and Austin), 211
Loading distal-extension removable partial dentures, stresses from (Craig and Farah), 274
mechanical, histologic study of response of masticatory and lining mucosa to, in vervet monkey (Fleisch and Austin), 211
unilateral, force transmission by indirect retainers during (McDowell), 616

M

Malpractice, dental: enormous and growing problem (Collett), 217
Mandibles, edentulous, complete mandibular subperiosteal implants for (Garefis), 670
Mandibular and maxillary ridges, similarities in resorption patterns of (Parkinson), 598
condyle position when recording centric relation, laminagraphic study of (Williamson), 561
displacement in survey population, prevalence and magnitude of (Rieder), 324
movement in three dimensions, computer-graphic representation of. Part I. Horizontal plane (Roedema et al.), 378
opening, maximum, in patients with and without history of TMJ dysfunction (Rieder), 441
path in grinding phase of mastication—review (Yaeger), 569
subperiosteal implants, complete, for edentulous mandibles (Garefis), 670
tongue prostheses, prosthetic reconstruction of (Belsky), 650
treatment dentures, technique for fabricating (Tupac), 110
Marginal adaptation and microleakage of composite resin restorations (Lüscher et al.), 409
failure in anterior restorations (Cunningham and Williams), 522
leakage of six enamel sealants, in vitro assessment of (Jensen and Handelman), 304
Mastication, grinding phase of, mandibular path in—review (Yaeger), 569
Masticatory and lining mucosa, histologic study of response of, to mechanical loading in vervet monkey (Fleisch and Austin), 211
performance and electromyographic activity of patients with complete dentures, overdentures, and natural teeth, clincial comparison of (Rissin et al.), 508
of complete dentures, occlusal plane orientation and (Carey), 368
Materials, elastomeric impression, tear strength of (Herfort et al.), 59
Mathematical considerations, measurement of distortion (Nicholls), 339
Maxillary and mandibular ridges, similarities in resorption patterns of (Parkinson), 598

Maxillary—Cont'd
defects, acquired, obturator prosthesis design for (Desjardins), 424
denture, complete, impression technique for (Cupero), 108
removable partial dentures, anterior rests for (Berg and Caputo), 139
resection, immediate surgical stent prosthesis for (Birnbach), 447
Maxillofacial prosthetics, color and its application in (Fine), 188
laboratories, vinyl chloride concentrations in (Guerra and Kronoveter), 200
Maxillomandibular relation records in stabilized record bases, combining final impressions with (Helft et al.), 135
Maximum mandibular opening in patients with and without history of TMJ dysfunction (Rieder), 441
Measurement of cusp height and ridge and groove direction using electrical transducer. Part I: instrumentation (Jaarda et al.), 678
of distortion—mathematical considerations (Nicholls), 339
Mechanical and physical behavior of polyurethane elastomer formulations used for facial prostheses (Gonzalez et al.), 307
loading, histologic study of response of masticatory and lining mucosa to, in vervet monkey (Fleisch and Austin), 211
Mesostructure bar, rigidity of implant denture substructure with (Bodine and Vakay), 88
Metal-ceramic restorations (Abbott), 293
posterior teeth for chronic bruxing patient (McArthur), 578
Method of stabilizing removable partial denture castings during clinical and laboratory procedures (Lorton), 344
verifying parallelism of preparations for Zest anchor attachments (Jaggers), 230
Microleakage and enamel finish (Khera and Chan), 414
and marginal adaptation of composite resin restorations (Lüscher et al.), 409
Microscope, scanning electron, investigation of in vivo performance of eight composite resins (Flynn), 529
Molding, compression, and fluid resin methods, comparison of, in processing dimensional changes (Hardy), 375
Monkey, vervet, histologic study of response of masticatory and lining mucosa to mechanical loading in (Fleisch and Austin), 211
Motor skill, oral, and speech, effect of immediate dentures on (Chierici et al.), 21
Movement, mandibular, in three dimensions, computer-graphic representation of. Part I. Horizontal plane (Roedema et al.), 378
Mucosa, alveolar, under complete dentures, histochemical and histopathologic studies of (Razek and Shaaban), 29
and bone, human alveolar, significance of age changes in (Nedelman and Bernick), 495
masticatory and lining, histologic study of response of, to mechanical loading in vervet monkey (Fleisch and Austin), 211
Multilayer and repaired composite resin, strength of (Boyer et al.), 63
Multiple post-core technique (Michnick and Raskin), 622
Muscle and TMJ dysfunction, using pantographic tracings to detect (Shields et al.), 80

N

Natural teeth, complete dentures, and overdentures, clinical comparison of masticatory performance and electromyographic activity of patients with (Rissin et al.), 508
removable partial denture design for few remaining (Bolouri), 346
Neck and head cancer, psychological problems of patients with (Turns and Sands), 68
Negro patients, reproduction of skin color and texture in facial prostheses for (Aina et al.), 74
New clasping system for unilateral distal-extension removable partial dentures (Garver), 268
method for coloring facial prostheses (Fine et al.), 643
News and notes, 122, 248, 362, 478, 591, 719

O

Obturator prosthesis design for acquired maxillary defects (Desjardins), 424
provisional, hollow-bulb, rapid technique for constructing (Beder and Todo), 237
speech prostheses, fabrication of, physiologic recording of soft palate for (Birnbach), 539
Occlusal and dimensional changes in fluid resin dentures (Antonopoulos), 605
plane orientation and masticatory performance of complete dentures (Carey), 368
registration and impression technique, combination, for extension-base removable partial dentures (Akerly), 226
treatment, successful, anterior guidance—key to (Broderson), 396
Occlusion, balanced, arrangement of anatomic-type artificial teeth into (Jordan), 484
complete denture, evaluation of use of face-bow in (Thorp et al.), 5
Once face-bow adapts to three articulators (Loos), 469
Opening, maximum mandibular, in patients with and without history of TMJ dysfunction (Rieder), 441
Oral motor skill and speech, effect of immediate dentures on (Chierici et al.), 21
Organizations, Federation of Prosthodontic: Annual Session Report, 1977 (McGivney), 352
Orientation, occlusal plane, and masticatory performance of complete dentures (Carey), 368
Overdentures(s), attachment fixation of: part II (Mensor), 16
complete dentures, and natural teeth, clinical comparison of masticatory performance and electromyographic activity of patients with (Rissin et al.), 508
Oxygenation, hyperbaric: prosthodontic responsibilities (Young and Bump), 100

P

Pain-dysfunction syndrome, TMJ, treatment prostheses in (Weinberg), 654
Palate, cleft, prosthodontically repaired, air flow and intelligibility of speech of normal speakers and speakers with (Schneiderman and Mann), 193
hard and soft, pathosis of (Nelson and Tsaknis), 436
soft, physiologic recording of, for fabrication of obturator speech prostheses (Birnbach), 539
Pantograph, Denar, as transfer-bow, procedural problems in using (Beck et al.), 166
Pantographic tracings, using to detect TMJ and muscle dysfunction (Shields et al.), 80
Parallelism of preparations for Zest anchor attachments, method of verifying (Jaggers), 230
Partial denture(s) castings, removable failure of, during service (Lewis), 147
method of stabilizing, during clinical and laboratory procedures (Lorton), 344
radiographic evaluation of porosities in (Lewis), 278
design, removable, for few remaining natural teeth (Bolouri), 346
dies, fixed, simplified technique for trimming (Shames), 697
frameworks, removable, chrome-cobalt, Thompson dowel-rest system modified for (Becker et al.), 384

Partial denture(s)—Cont'd
removable, anterior rests for (Berg and Caputo), 139
distal-extension, stresses from loading (Craig and Farah), 274
dual-path design for (King), 384
extension-base, combination impression and occlusal registration technique for (Akerly), 226
extracoronal, service in Canada (Sykora), 37
inconspicuous retention for (King et al.), 505
interim complete immediate dentures for patient wearing (Casey), 466
on hydrocolloid cast, processing acrylic resin bases for (Simmons et al.), 692
research and its clinical significance (Cecconi), 203
unilateral distal-extension, new clasping system for (Garver), 268
Path, condylar, characteristics of, in internal derangements of TMJ (Farrar), 319
mandibular, in grinding phase of mastication—review (Yaeger), 569
Pathosis of hard and soft palate (Nelson and Tsaknis), 436
Patient(s), chronic bruxing, metal posterior teeth for (McArthur), 578
Negro, reproduction of skin color and texture in facial prostheses for (Aina et al.), 74
wearing removable partial dentures, interim complete immediate dentures for (Casey), 466
with complete dentures, overdentures, and natural teeth, clinical comparison of masticatory performance and electromyographic activity of (Rissin et al.), 508
with head and neck cancer, psychological problems of (Turns and Sands), 68
Patterns, resorption, of maxillary and mandibular ridges, similarities in (Parkinson), 598
Performance, masticatory, of complete dentures, occlusal plane orientation and (Carey), 368
Phase, grinding, of mastication, mandibular path in—review (Yaeger), 569
Physical and mechanical behavior of polurethane elastomer formulations used for facial prostheses (Gonzalez et al.), 307
Physiologic recording of soft palate for fabrication of obturator speech prostheses (Birnbach), 539
Pierre Robin syndrome, prosthodontic treatment for (Kelly and Sorenson), 554
Pin-retained amalgam and composite resin cores, comparison of (Fujimoto et al.), 512
composites for splinting anterior teeth (Schnepper), 162
Plane, horizontal, computer-graphic representation of mandibular movement in three dimensions. Part I (Roedema et al.), 378
occlusal, orientation, and masticatory performance of complete dentures (Carey), 368
Plastic teeth, bonding of, to two heat-curing denture base resins (Morrow et al.), 565
Polishing and finishing denture bases, technique for (Welker et al.), 240
Polycarboxylate cements, punch shear strength of (Santos et al.), 420
Polymers, denture base, creep and hardness testing of some (Stafford and Huggett), 682
Polyurethane elastomer(s) for facial prostheses (Gonzalez), 179
formulations used for facial prostheses, physical and mechanical behavior of (Gonzalez et al.), 307
Population, survey, prevalence and magnitude of mandibular displacement in (Rieder), 324
Porcelain, bonded, study of various factors influencing shade of (Barghi and Richardson), 282
Porosities in removable partial denture castings, radiographic evaluation of (Lewis), 278
Position, mandibular condyle, when recording centric relation, laminagraphic study of (Williamson), 561
Post-core restorations, fractured, procedure for repairing (Samani and Harris), 627
technique, multiple (Michnick and Raskin), 622
Posterior intermediate restoration, single, fabrication of (Nayyar and Edwards), 688
teeth, metal, for chronic bruxing patient (McArthur), 578
Posts, endodontic, interlocking, direct fabrication of (Welsh and Priddy), 115
Powder, spherical, for retaining thermosetting acrylic resin veneers (Tanaka et al.), 295
Practical considerations in iontophoresis of fluoride for desensitizing dentin (Gangarosa and Park), 173
Preparations for Zest anchor attachments, parallelism of, method of verifying (Jaggers), 230
Pressure, blood, and pulse rate response, human, to racemic epinephrine retraction cord (Pelzner et al.), 287
Prevalence and magnitude of mandibular displacement in survey population (Rieder), 324
Problems, psychological, of patients with head and neck cancer (Turns and Sands), 68
Procedural problems in using Denar pantograph as transfer-bow (Beck et al.), 166
Procedure for repairing fractured post-core restorations (Samani and Harris), 627
Processing acrylic resin bases for removable partial dentures on hydrocolloid cast (Simmons et al.), 692
dimensional changes, comparison of fluid resin and compression molding methods in (Hardy), 375
Prostheses, facial, evaluation of (Jani and Schaaf), 546
for Negro patients, reproduction of skin color and texture in (Aina et al.), 74
new method for coloring (Fine et al.), 643
physical and mechanical behavior of polyurethane elastomer formulations used for (Gonzalez et al.), 307
polyurethane elastomers for (Gonzalez), 179
mandibular tongue, prosthetic reconstruction of (Belsky), 650
obturator speech, fabrication of, physiologic recording of soft palate for (Birnbach), 539
treatment, in TMJ dysfunction-pain syndrome (Weinberg), 654
Prosthesis, immediate surgical stent, for maxillary resection (Birnbach), 447
obturator, design for acquired maxillary defects (Desjardins), 424
Prosthetic(s), maxillofacial, color and its application in (Fine), 188
laboratories, vinyl chloride concentrations in (Guerra and Kronoveter), 200
reconstruction of mandibular tongue prostheses (Belsky), 650
Prosthodontic Organizations, Federation of: Annual Session Report, 1977 (McGivney), 352
responsibilities, hyperbaric oxygenation (Young and Bump), 100
solution, delivering surface irradiation to persistent unresectable squamous cell carcinomas (Sheiner and Ager), 551
treatment for Pierre Robin syndrome (Kelly and Sorenson), 554
Prosthodontically repaired cleft palate, air flow and intelligibility of speech of normal speakers and speakers with (Schneiderman and Mann), 193
Provisional obturator, hollow-bulb, rapid technique for constructing (Beder and Todo), 237

Psychological problems of patients with head and neck cancer (Turns and Sands), 68
Pulse rate and blood pressure response, human, to racemic epinephrine retraction cord (Pelzner et al.), 287
Punch shear strength of polycarboxylate cements (Santos et al.), 420

Q

Quint, Hanau, and Hanau's Laws of articulation, reevaluation of (Levin), 254

R

Racemic epinephrine retraction cord, human blood pressure and pulse rate response to (Pelzner et al.), 287
Radiographic evaluation of porosities in removable partial denture castings (Lewis), 278
technique for detection of internal defects in dental castings (Pascoe and Wimmer), 150
Radiopaque counterpart, composite resin and its, in vivo comparison of (Osborne et al.), 406
Rapid technique for constructing hollow-bulb provisional obturator (Beder and Todo), 237
Rate, pulse, and blood pressure response, human, to racemic epinephrine retraction cord (Pelzner et al.), 287
Readers' round table, 242, 358, 473, 587, 699
Recent legal decisions and their effects on dentists (Gamer), 106
Reconstruction, prosthetic, of mandibular tongue prostheses (Belsky), 650
Record(s) bases, stabilized, combining final impressions with maxillomandibular relation records in (Helft et al.), 135
maxillomandibular relation, in stabilized record bases, combining final impressions with (Helft et al.), 135
Recording centric relation, laminagraphic study of mandibular condyle position when (Williamson), 561
physiologic, of soft palate for fabrication of obturator speech prostheses (Birnbach), 539
Reevaluation of Hanau's Laws of articulation and Hanau Quint (Levin), 254
Registration, occlusal, and impression technique, combination, for extension-base removable partial dentures (Akerly), 226
Relation, centric, laminagraphic study of mandibular condyle position when recording (Williamson), 561
records, maxillomandibular, in stabilized record bases, combining final impressions with (Helft et al.), 135
Removable dentures, completed bases for (Graser), 232
partial denture(s), anterior rests for (Berg and Caputo), 139
castings, failure of, during service (Lewis), 147
method of stabilizing, during clinical and laboratory procedures (Lorton), 344
radiographic evaluation of porosities in (Lewis), 278
design for few remaining natural teeth (Bolouri), 346
distal-extension, stresses from loading (Craig and Farah), 274
unilateral, new clasping system for (Garver), 268
dual-path design for (King), 384
extension-base, combination impression and occlusal registration technique for (Akerly), 226
extracoronal, service in Canada (Sykora), 37
frameworks, chrome-cobalt, Thompson dowel-rest system modified for (Becker et al.), 384
inconspicuous retention for (King et al.), 505
interim complete immediate dentures for patient wearing (Casey), 466
on hydrocolloid cast, processing acrylic resin bases for (Simmons et al.), 692
research and its clinical significance (Cecconi), 203
Removal technique, crown, safe (Garver and Wisser), 56
Repaired and multilayer composite resin, strength of (Boyer et al.), 63
cleft palate, prosthodontically, air flow and intelligibility of speech or normal speakers and speakers with (Schneiderman and Mann), 193
Repairing fractured post-core restorations, procedure for (Samani and Harris), 627
Representation, computer-graphic, of mandibular movement in three dimensions. Part I. Horizontal plane (Roedema et al.), 378
Reproduction of skin color and texture in facial prostheses for Negro patients (Aina et al.), 74
Research, removable partial denture, and its clinical significance (Cecconi), 203
Resection, maxillary, immediate surgical stent prosthesis for (Birnbach), 447
Resin(s), acrylic, accurate, temporary restorations (Kaiser), 158
temporary crowns, three currently used, histologic evaluation of tissue response to (MacEntee et al.), 42
bases, acrylic, processing, for removable partial dentures on hydrocolloid cast (Simmons et al.), 692
composite, and its radiopaque counterpart, in vivo comparison of (Osborne et al.), 406
eight, scanning electron microscope investigation of in vivo performance of (Flynn), 529
evaluation of viscosity-reducing agent for (Metzler and Chandler), 527
multilayer and repaired, strength of (Boyer et al.), 63
copings, acrylic: adjunct to fixed restorative dentistry (Crispin), 632
cores, composite, comparison of pin-retained amalgam and (Fujimoto et al.), 512
denture(s) base, heat-curing, two, bonding of palstic teeth to (Morrow et al.), 565
fluid, dimensional and occlusal changes in (Antonopoulos), 605
fluid, and compression molding methods in processing dimensional changes, comparison of (Hardy), 375
restorations, composite, microleakage and marginal adaptation of (Lüscher et al.), 409
restoration of fractured anterior teeth, acid-etch/composite: part II (Fuks and Shapira), 637
veneers, thermosetting acrylic, spherical powder for retaining (Tanaka et al.), 295
Resorption patterns of maxillary and mandibular ridges, similarities in (Parkinson), 598
Response of masticatory and lining mucosa to mechanical loading in vervet monkey, histologic study of (Fleisch and Austin), 211
tissue, to three currently used temporary acrylic resin crowns, histologic evaluation of (MacEntee et al.), 42
Restoration(s), anterior, marginal failure in (Cunningham and Williams), 522
composite resin, microleakage and marginal adaptation of (Lüscher et al.), 409
dental, carving (Wiland), 582
metal-ceramic (Abbott), 293
of fractured anterior teeth, acid-etch/composite resin: part II (Fuks and Shapira), 637
post-core, fractured, procedure for repairing (Samani and Harris), 627
single anterior intermediate, fabrication of (Nayyar and Edwards), 574
posterior intermediate, fabrication of (Nayyar and Edwards), 688
temporary, accurate acrylic resin (Kaiser), 158
Restorative dentistry, fixed, adjunct to, acrylic resin copings (Crispin), 632

Rests, anterior, for maxillary removable partial dentures (Berg and Caputo), 139
Retainers, indirect, force transmission by, during unilateral loading (McDowell), 616
Retention, inconspicuous, for removable partial dentures (King et al.), 505
of endodontic dowels: effects of cement, dowel length, diameter, and design (Standlee et al.), 401
of simulated cast crowns, effect of ultrasonic instrumentation on (McQuade et al.), 640
Retentive ability of acid-etched dentin (Torney), 169
Retraction cord, racemic epinephrine, human blood pressure and pulse rate response to (Pelzner et al.), 287
Review, mandibular path in grinding phase of mastication (Yaeger), 569
Ridge(s) and groove direction and cusp height, measurement of, using electrical transducer. Part I: instrumentation (Jaarda et al.), 678
maxillary and mandibular, similarities in resorption patterns of (Parkinson), 598
Rigidity of implant denture substructure with mesostructure bar (Bodine and Vakay), 88
Rubber-base impression material, evaluation of (Gunther and Welsh), 95

S

Satisfaction with dentures, counseling and related factors influencing (Guckes et al.), 259
Scanning electron microscope investigation of in vivo performance of eight composite resins (Flynn), 529
Sealants, enamel, six, in vitro assessment of marginal leakage of (Jensen and Handelman), 304
Service, failure of removable partial denture castings during (Lewis), 147
Shade of bonded porcelain, study of various factors influencing (Barghi and Richardson), 282
Shear strength, punch, of polycarboxylate cements (Santos et al.), 420
Should dentures be worn continuously (Tautin), 372
Significance of age changes in human alveolar mucosa and bone (Nedelman and Bernick), 495
Similarities in resorption patterns of maxillary and mandibular ridges (Parkinson), 598
Simple cathode holder for electroplating copper-band impressions (Grajower and Stern), 285
Simplified technique for trimming fixed partial denture dies (Shames), 697
Simulated cast crowns, effect of ultrasonic instrumentation on retention of (McQuade et al.), 640
Single anterior intermediate restoration, fabrication of (Nayyar and Edwards), 574
posterior intermediate restoration, fabrication of (Nayyar and Edwards), 688
Sjögren's syndrome: diagnosis and dental treatment (Barker et al.), 536
Skin color and texture, reproduction of, in facial prostheses for Negro patients (Aina et al.), 74
Smile, anatomy of (Matthews), 128
Soft and hard palate, pathosis of (Nelson and Tsaknis), 436
palate, physiologic recording of, for fabrication of obturator speech prostheses (Birnbach), 539
-tissue working cast (Balshi and Hancock), 349
Speakers, normal, and speakers with prosthodontically repaired cleft palate, air flow and intelligibility of speech of (Schneiderman and Mann), 193
with prosthodontically repaired cleft palate, air flow and intelligibility of speech of normal speakers and (Schneiderman and Mann), 193
Speech, effect of immediate dentures on oral motor skill and (Chierici et al.), 21
intelligibility of, of normal speakers and speakers with prosthodontically repaired cleft palate, air flow and (Schneiderman and Mann), 193
prostheses, obturator, fabrication of, physiologic recording of soft palate for (Birnbach), 539
Spherical powder for retaining thermosetting acrylic resin veneers (Tanaka et al.), 295
Splinting anterior teeth, pin-retained composites for (Schnepper), 162
Squamous cell carcinomas, persistent unresectable, delivering surface irradiation to: prosthodontic solution (Sheiner and Ager), 551
Stabilized record bases, combining final impressions with maxillomandibular relation records in (Helft et al.), 135
Stabilizing removable partial denture castings during clinical and laboratory procedures, method of (Lorton), 344
Stent prosthesis, immediate surgical, for maxillary resection (Birnbach), 447
Strength of multilayer and repaired composite resin (Boyer et al.), 63
punch shear, of polycarboxylate cements (Santos et al.), 420
tear, of elastomeric impression materials (Herfort et al.), 59
Stresses from loading distal-extension removable partial dentures (Craig and Farah), 274
Student, dental, as technician: to what degree (Weintraub), 459
Study of various factors influencing shade of bonded porcelain (Barghi and Richardson), 282
Subperiosteal implants, complete mandibular, for edentulous mandibles (Garefis), 670
Substructure, denture implant, rigidity of, with mesostructure bar (Bodine and Vakay), 88
Surface irradiation, delivering, to persistent unresectable squamous cell carcinomas: prosthodontic solution (Sheiner and Ager), 551
Surgical stent prosthesis, immediate, for maxillary resection (Birnbach), 447
Survey population, prevalence and magnitude of mandibular displacement in (Rieder), 324
Syndrome, Pierre Robin, prosthodontic treatment for (Kelly and Sorenson), 554
Sjögren's: diagnosis and dental treatment (Barker et al.), 536
TMJ dysfunction-pain, treatment prostheses in (Weinberg), 654

T

Tear strength of elastomeric impression materials (Herfort et al.), 59
Technician, dental student as: to what degree (Weintraub), 459
Technique, combination impression and occlusal registration, for extension-base removable partial dentures (Akerly), 226
for fabricating mandibular treatment dentures (Tupac), 110
for finishing and polishing denture bases (Welker et al.), 240
radiographic, for detection of internal defects in dental castings (Pascoe and Wimmer), 150
rapid, for constructing hollow-bulb provisional obturator (Beder and Todo), 237
Teeth, anatomic-type artificial, arrangement of, into balanced occlusion (Jordan), 484
anterior, fractured, acid-etch/composite resin restoration of: part II (Fuks and Shapira), 637
anterior, pin-retained composites for splinting (Schnepper), 162
metal posterior, for chronic bruxing patient (McArthur), 578
natural, complete dentures, and overdentures, clinical comparison of masticatory performance and electromyographic activity of patients with (Rissin et al.), 508

Teeth, natural—Cont'd
removable partial denture design for few remaining (Bolouri), 346
plastic, bonding of, to two heat-curing denture base resins (Morrow et al.), 565
Temporary acrylic resin crowns, three currently used, histologic evaluation of tissue response to (MacEntee et al.), 42
restorations, accurate acrylic resin (Kaiser), 158
Testing, hardness and creep, of some denture base polymers (Stafford and Huggett), 682
Texture and color, skin, reproduction of, in facial prostheses for Negro patients (Aina et al.), 74
Thermosetting acrylic resin veneers, spherical powder for retaining (Tanaka et al.), 295
Thickness, film, of cements beneath complete crowns (Hembree et al.), 533
Thompson dowel-rest system modified for chrome-cobalt removable parital denture frameworks (Becker et al.), 384
Through eyes of editor (Section editors), 1, 125, 251, 365, 481, 595
Tissue response to three currently used temporary acrylic resin crowns, histologic evaluation of (MacEntee et al.), 42
soft-, working cast (Balshi and Hancock), 349
TMJ and muscle dysfunction, using pantographic tracings to detect (Shields et al.), 80
characteristics of condylar path in internal derangements of (Farrar), 319
dysfunction, history of, maximum mandibular opening in patients with and without (Rieder), 441
-pain syndrome, treatment prostheses in (Weinberg), 654
Tongue prostheses, mandibular, prosthetic reconstruction of (Belsky), 650
Tooth display, anterior, kinetics of (Vig and Brundo), 502
Tracings, pantographic, using, to detect TMJ and muscle dysfunction (Shields et al.), 80
Transducer, electrical, measurement of cusp height and ridge and groove direction using. Part I: instrumentation (Jaarda et al.), 678
Transfer-bow, procedural problems in using Denar pantograph as (Beck et al.), 166
vise, articulator adjustments using (Tradowsky), 47
Transmission, force, by indirect retainers during unilateral loading (McDowell), 616
Treatment, dental, and diagnosis, Sjögren's syndrome (Barker et al.), 536
Treatment—Cont'd
dentures, mandibular, technique for fabricating (Tupac), 110
prostheses in TMJ dysfunction-pain syndrome (Weinberg), 654
prosthodontic, for Pierre Robin syndrome (Kelly and Sorenson), 554
successful occlusal, anterior guidance—key to (Broderson), 396
Trimming fixed partial denture dies, simplified technique for (Shames), 697
Tubercles, fractured genial (Goebel), 603

U

Ultrasonic instrumentation, effect of, on retention of simulated cast crowns (McQuade et al.), 640
Unilateral distal-extension removable partial dentures, new clasping system for (Garver), 268
loading, force transmission by indirect retainers during (McDowell), 616
Unresectable squamous cell carcinomas, persistent, delivering surface irradiation to: prosthodontic solution (Sheiner and Ager), 551
Using pantographic tracings to detect TMJ and muscle dysfunction (Shields et al.), 80

V

Veneers, thermosetting acrylic resin, spherical powder for retaining (Tanaka et al.), 295
Verifying parallelism of preparations for Zest anchor attachments, method of (Jaggers), 230
Vervet monkey, histologic study of response of masticatory and lining mucosa to mechanical loading in (Fleisch and Austin), 211
Vinyl chloride concentrations in maxillofacial prosthetics laboratories (Guerra and Kronoveter), 200
Viscosity-reducing agent for composite resins, evaluation of (Metzler and Chandler), 527
Vise, transfer, articulator adjustments using (Tradowsky), 47

W

Working cast, soft-tissue (Balshi and Hancock), 349

Z

Zest anchor attachments, parallelism of preparations for, method of verifying (Jaggers), 230

Subject Index

A

Abrasion resistance, porosity, and surface texture, finished, of Aspa glass-ionomer cement (Smales and Joyce), 549
Abrasive wear and microstructure of composite resins, relationship between (Draughn and Harrison), 220
Abutment(s), blade-vent implant, analysis of stress on fixed partial denture with, (Takahashi et al.), 186
  overdentures, incidence and control of caries on, 2-year longitudinal study of overdenture patients. Part I (Toolson and Smith), 486
  for removable partial dentures, technique for restoring (Teppo and Smith), 398
  stress in overdentures (White), 13
Accuracy of soldering indices for fixed prostheses, comparison of (Moon et al.), 35
Acrylic denture base resins, coloring (Winkler and Vernon), 4
  resin blockout for interim removable partial dentures (Stankewitz), 470
    removable partial dentures with clasps, interim, fabrication of, (Reitz and Weiner), 686
Adaptation, speech, conditioning prostheses viewed from standpoint of (Hamlet et al.) 60
Adhesive, denture, antimycotic, in treatment of denture stomatitis (Scher et al.), 622
Alginate (irreversible hydrocolloid) impression material, occlusal registrations using (Scott), 517
Alloys, amalgam, marginal integrity of, in relation to creep: preliminary report (Jordan et al.), 299
  ceramic–base-metal, two, characterization of (Huget et al.), 637
Alveolar bone loss in overdentures: 5-year study (Crum and Rooney), 610
  ridge augmentation with tricalcium phosphate ceramic (Nery et al.), 663
Amalgam alloys, marginal integrity of, in relation to creep: preliminary report (Jordan et al.), 299
  restorations, cyanoacrylate as cavity liner for (Newman et al.), 422
    fracture strength of, influence of axiopulpal line angle and proximal retention on (Amorim et al.), 169
  system(s), effects of burnishing on microleakage in (Cothren et al.), 163
    several, microleakage of: animal study (Andrews and Hembree), 418
American Academy of Restorative Dentistry, Committee on Scientific Investigation of, report of (Gilmore et al.), 192
  Board of Prosthodontics (Brown), 689
Analysis of geometry of finishing lines for full crown restorations (Pascoe), 157
  of stress on fixed partial denture with blade-vent implant abutment (Takahashi et al.), 186

July, 1-118; August, 119-240; September, 241-358; October, 359-482; November, 483-606; December, 607-720.

Anatomic comparison to arbitrary reference notch on Hanau articulators (Lauciello and Applebaum), 676
Anesthesia, functional occlusal forces under (De Boever et al.), 402
Angle, axiopulpal line, and proximal retention, influence of, on fracture strength of amalgam restorations (Amorim et al.), 169
Animal study, microleakage of several amalgam systems (Andrews and Hembree), 418
Antimycotic denture adhesive in treatment of denture stomatitis (Scher et al.), 622
Anxiety levels and facial pains: considerations for treatment (Marbach et al.), 434
Articulator(s), Hanau, arbitrary reference notch on, anatomic comparison to (Lauciello and Appelbaum), 676
new semiadjustable. Part IV: investigation of three semiadjustable articulators (Tanaka and Finger), 288
Aspa glass-ionomer cement, finished surface texture, abrasion resistance, and porosity of (Smales and Joyce), 549
Asymmetry in TMJ radiographs, evaluation of (Weinberg), 315
Atrophy, central papillary, of tongue, and denture stomatitis (Farman et al.), 253
Axiopulpal line angle and proximal retention, influence of, on fracture strength of amalgam restorations (Amorim et al.), 169
Axis, terminal hinge, and pantographics, measurement of cusp height and ridge and groove direction using electrical transducer. Part II (Jaarda et al.), 83

B

Base(s), composite resin, cast gold post and core and pin-retained: comparative study in strength (Moll et al.), 642
-metal–ceramic alloys, two, characterization of (Huget et al.), 637
resins, acrylic denture, coloring (Winkler and Vernon), 4
Basic principles of obturator design for partially edentulous patients. Part I: classification (Aramany), 554
Part II: design principles (Aramany), 656
Basic wax contouring for complete dentures (Renner and Blakeslee), 343
Bennett movement, voluntary and induced, clinical importance of (Tupac), 39
Biofeedback, rest vertical dimension determined by electromyography with, as compared to conventional methods (Feldman et al.), 216
Blade-vent implant abutment, fixed partial denture with, analysis of stress on (Takahashi et al.), 186
Blockout, acrylic resin, for interim removable partial dentures (Stankewitz), 470
Bond strength of three cements determined by centrifugal testing (Arfaei and Asgar), 294
Bone loss, alveolar, in overdentures: 5-year-study (Crum and Rooney), 610
Book reviews, 112, 234, 352, 477, 598, 699
Border movements, mandibular, effects of occlusal therapy on pantographic reproducibility (Crispin et al.), 29
evaluation of: their character and significance (Lundeen et al.), 442
Burnishing, effects of, on microleakage in amalgam system (Cothren et al.), 163

C

Cancer chemotherapy, effect of oral hygiene on stomatitis in patients receiving (Lindquist et al.), 312
stomatotoxic manifestations of (Dreizen), 650
Carbon endosseous implants, vitreous, instrumentation for placement of (Voss and Grenoble), 567
Caries on overdenture abutments, incidence and control of, 2-year longitudinal study of overdenture patients. Part I (Toolson and Smith), 486
Cast(s) gold post and core and pin-retained composite resin bases: comparative study in strength (Moll et al.), 642
master, technique for attaching, to its split mounting index (Scandrett and Hanson), 467
patient, on slides, multiview method for showing (Murrey), 109
restorations, pressuring techniques and cement thickness for (Koyano et al.), 544
Cavity liner for amalgam restorations, cyanoacrylate as (Newman et al.), 422
varnish and its application: 'once is not enough' (Lund et al.), 534
Cement(s), Aspa glass-ionomer, finished surface texture, abrasion resistance, and porosity of (Smales and Joyce), 549
luting, clinical solubility and disintegration of, method for assessing, (Osborne et al.), 413
solubility, clinical evaluation of (Mitchem and Gronas), 453
thickness and pressuring techniques for cast restorations (Koyano et al.), 544
three, bond strength of, determined by centrifugal testing (Arfaei and Asgar), 294
zinc phosphate, mixed on room temperature and frozen slabs, comparison of properties for (Myers et al.), 409
Cementation, crown, intracoronal pressure during (Hoard et al.), 520
Cemented complete crowns, marginal microleakage in (Mondelli et al.), 632
Central papillary atrophy of tongue and denture stomatitis (Farman et al.), 253
Centrifugal testing, bond strength of three cements determined by (Arfaei and Asgar), 294
Ceramic–base-metal alloys, two, characterization of (Huget et al.), 637
-metal crown, new (McLean et al.), 273
pontics for fixed partial dentures, facilitating fabrication of (Kaiser), 591
tricalcium phosphate, alveolar ridge augmentation with (Nery et al.), 668
Chairside modifications of dentures for tissue conditioning materials (Bauman), 225
Characterization of two ceramic–base-metal alloys (Huget et al.), 637
Chemotherapy, cancer, effect of oral hygiene on stomatitis in patients receiving (Lindquist et al.), 312
stomatotoxic manifestations of (Dreizen), 650
Chewing, neuropathologic, use of tongue-depressing stents for (Jackson), 309
Clasps, interim acrylic resin removable partial dentures with, fabrication of (Reitz and Weiner), 686
Clinical evaluation of cement solubility (Mitchem and Gronas), 453
importance of voluntary and induced Bennett movement (Tupac), 39
solubility and disintegration of luting cements, method for assessing (Osborne et al.), 413
Coloring acrylic denture base resins (Winkler and Vernon), 4
Combinations of diverse retainers in removable partial dentures (Langer), 378
Combined endodontic and restorative treatment considerations (Waliszewski and Sabala), 152
Committee on Scientific Investigation of American Academy of Restorative Dentistry, report of (Gilmore et al.), 192
Comparison of accuracy of soldering indices for fixed prostheses (Moon et al.), 35
of properties for zinc phosphate cements mixed on room temperature and frozen slabs (Myers et al.), 409
Complete denture(s), basic wax contouring for (Renner and Blakeslee), 343

Complete dentures—Cont'd
maxillary, role of saliva in retention of (Kawazoe and Hamada), 131
patients, self-administered questionnaire—aid in managing (Nassif), 363
transitional immediate (McCartney), 593
Composite resin(s) bases, cast gold post and core and pin-retained: comparative study in strength (Moll et al.), 642
relationship between abrasive wear and microstructure of (Draughn and Harrison), 220
Computer-graphic representation of mandibular movements in three dimensions. Part II: sagittal and frontal planes (Roedema et al.), 385
Conditioners, tissue, mechanical properties of. Part I: theoretical considerations, behavioral characteristics, and tensile properties (McCarthy and Moser), 89
Part II: creep characteristics (McCarthy and Moser), 334
Conditioning prostheses viewed from standpoint of speech adaptation (Hamlet et al.), 60
Construction of orbital prostheses using silicone pattern technique (Oral et al.), 430
Contouring, basic wax, for complete dentures (Renner and Blakeslee), 343
Core(s) and post(s), cast gold, and pin-retained composite resin bases: comparative study in strength (Moll et al.), 642
direct pattern technique for (Miller), 392
T-pins in direct pattern technique for (Ram), 103
Correction of prognathism with fixed and removable partial dentures (Boyd), 509
Corrosion and microstructure of Progold (Sarkar et al.), 50
Cranioplasty prosthesis fabrication, technique for (Jordan et al.), 230
Crazing, dentinal, and interpin distance (Khera et al.), 538
Creep characteristics, mechanical properties of tissue conditioners. Part II (McCarthy and Moser), 334
marginal integrity of amalgam alloys in relation to: preliminary report (Jordan et al.), 299
Crown(s) cementation, intracoronal pressure during (Hoard et al.), 520
complete, cemented, marginal microleakage in (Mondelli et al.), 632
new metal-ceramic (McLean et al.), 273
restorations, full, analysis of geometry of finishing lines for (Pascoe), 157
Cusp height and ridge and groove direction, measurement of, using electrical transducer. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Cyanoacrylate as cavity liner for amalgam restorations (Newman et al.), 422

D

Dental esthetics and golden proportion (Levin), 244
Dentinal crazing and interpin distance (Khera et al.), 538
Dentistry, geriatric: problem (Massler), 324
Denture(s) abutments, removable partial, visualization of stress and strain related to (White), 143
adhesive, antimycotic, in treatment of denture stomatitis (Scher et al.), 622
base resins, acrylic, coloring (Winkler and Vernon), 4
chairside modifications of, for tissue conditioning materials (Bauman), 225
complete, basic wax contouring for (Renner and Blakeslee), 343
maxillary, role of saliva in retention of (Kawazoe and Hamada), 131
patients, self-administered questionnaire—aid in managing (Nassif), 363
esthetics is more than tooth selection (Tautin), 127
fixed partial, with blade-vent implant abutment, analysis of stress on (Takahashi et al.), 186
Dentures, fixed partial—Cont'd
facilitating fabrication of ceramic-metal pontics for (Kaiser), 591
frameworks, removable partial, laboratory procedures for fitting (Gay), 227
immediate, effects of, on certain structural and perceptual parameters of speech (Chaney et al.), 8
interim acrylic resin removable partial, with clasps, fabrication of (Reitz and Weiner), 686
occlusion(s), posterior, photoelastic comparison of (Lopuck et al.), 18
swallowing and (Laird), 614
partial, fixed and removable, correction of prognathism with (Boyd), 509
swing-lock: alternative approach to removable partial denture service (Antos et al.), 257
prosthodontics, preclinical, performance criteria in (Razzoog et al.), 576
removable partial, abutments for, technique for restoring (Teppo and Smith), 398
combinations of diverse retainers in (Langer), 378
interim, acrylic resin blockout for (Stankewitz), 470
layered silicone rubber technique for flasking (Scandrett et al.), 349
service of, conventional, swing-lock partial denture: alternative approach to (Antos et al.),257
sore mouth syndrome, etiologic factors in (Nater et al.), 367
stomatitis, antimycotic denture adhesive in treatment of (Scher et al.), 622
and central papillary atrophy of tongue (Farman et al.), 253
technique, transitional (Chalifoux), 682
transitional immediate complete (McCartney), 593
Design, improved, for Thompson dowel semiprecision intracoronal retainer (McLeod), 513
obturator, basic principles of, for partially edentulous patients. Part I: classification (Aramany), 554
Dimension(s), rest vertical, determined by electromyography with biofeedback as compared with conventional methods (Feldman et al.), 216
three, computer-graphic representation of mandibular movements in. Part II: sagittal and frontal planes (Roedema et al.), 385
Direct pattern technique for posts and cores (Miller), 392
T-pins in (Ram), 103
wax method for fabrication of three-piece metal molds (Oral and Zini), 558
Direction, ridge and groove, and cusp height, measurement of, using electrical transducer, Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Directory, 113, 235, 354, 477, 601, 700
Disintegration and solubility, clinical, of luting cementss, method for assessing (Osborne et al.), 413
Displacement, mandibular, incidence of, frequency of parafunctional occlusal habits compared with (Rieder), 75
vertical, of distal-extension ridges by different impression techniques (Vahidi), 374
Distal-extension ridges, vertical displacement of, by different impression techniques (Vahidi), 374
Dowel form and tensile force (Johnson and Sakumura), 645
semiprecision intracoronal retainer, Thompson, improved design for (McLeod), 513
Dysfunction, masticatory system, pharmacotherapy of (Jagger), 183
-pain syndrome, myofascial (Nel), 438
selective tomography of TMJ and (Rozencweig and Martin), 67
Dysplasia, X-linked hypohidrotic ectodermal—unusual prosthetic problem (Nortjé et al.), 137

E

Ectodermal dysplasia, X-linked hypohidrotic—unusual prosthetic problem (Nortjé et al.), 137
Edentulous patient(s), partially, basic principles of design for. Part I: classification (Aramancy), 554
Part II: design principles (Aramany),
phase one of—nutrition (Barone), 122
single-visit hollow obturators for (Parel and LaFuente), 426
Education in maxillofacial prosthetics (Chalian), 579; (Drane), 583; (Laney), 587
Effect(s) of burnishing on microleakage in amalgam system (Cothren et al.), 163
of immediate dentures on certain structural and perceptual parameters of speech (Chaney et al.), 8
of occlusal splints on TMJ symptomatology (Carraro and Caffessee), 563
of occlusal therapy on pantographic reproducibility of mandibular border movements (Crispin et al.), 29
of oral hygiene on stomatitis in patients receiving cancer chemotherapy (Lindquist et al.), 312
of time lapse between mixing and loading on flow of tissue conditioning materials (Ward), 499
Electrical transducer, measurement of cusp height and ridge and groove direction using. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Electromyography, rest vertical dimension determined by, with biofeedback as compared to conventional methods (Feldman et al.), 216
Electrosurgery, histologic evaluation of, with varying frequency and waveform (Maness et al.), 304
Emergency hydrocolloid unit (Snyder), 596
Enamel, resin-supported internally etched, in vitro study of (Espinosa), 526
Endodontic and restorative treatment considerations, combined (Waliszewski and Sabala), 152
Endosseous implants, vitreous carbon, instrumentation for placement of (Voss and Grenoble), 567
Esthetics, dental, and golden proportion (Levin), 244
denture, is more than tooth selection (Tautin), 127
Etiologic factors in denture sore mouth syndrome (Nater et al.), 367
Evaluation of asymmetry in TMJ radiographs (Weinberg), 315
of mandibular border movements: their character and significance (Lundeen et al.), 442

F

Fabricating hollow obturator, method of (Schneider), 351
Fabrication of interim acrylic resin removable partial dentures with clasps (Reitz and Weiner), 686
occlusal splint (Kass and Tragaskes), 461
tray, for unusually large maxillae (Kazanoglu), 107
Facial pains and anxiety levels: considerations for treatment (Marbach et al.), 434
prostheses, universal simplified mold technique for construction of (Zini et al.), 56
Facilitating fabrication of ceramic-metal pontics for fixed partial dentures (Kaiser), 591
Finished surface texture, abrasion resistance, and porosity of Aspa glass-ionomer cement (Smales and Joyce), 549
Finishing lines for full crown restorations, analysis of geometry of (Pascoe), 157
Fixed partial denture(s) with blade-vent implant abutment, analysis of stress on (Takahashi et al.), 186
facilitating fabrication of ceramic-metal pontics for (Kaiser), 591
prostheses, soldering indices for, comparison of (Moon et al.), 35
and removable partial dentures, correction of prognathism with (Boyd), 509
Flasking removable partial dentures, layered silicone rubber technique for (Scandrett et al.), 349
Flow of tissue conditioning materials, effect of time lapse between mixing and loading on (Ward), 499
Force(s), functional occlusal: investigation by telemetry (De Boever et al.), 326
telemetry system to study (McCall et al.), 98
under anesthesia (De Boever et al.), 402
tensile, and dowel form (Johnson and Sakumura), 645
Fracture strength of amalgam restorations, influence of axiopulpal line angle and proximal retention on (Amorim et al.), 169
Frameworks, removable partial denture, laboratory procedure for fitting (Gay), 227
Frequency of parafunctional occlusal habits compared with incidence of mandibular displacement (Rieder), 75
and waveform, varying, histologic evaluation of electrosurgery with (Maness et al.), 304
Frontal and sagittal planes, computer-graphic representation of mandibular movements in three dimensions. Part II: (Roedema et al.), 385
Frozen and room temperature slabs, comparison of properties for zinc phosphate cements mixed on (Myers et al.), 409
Full crown restorations, analysis of geometry of finishing lines for (Pascoe), 157
Functional occlusal forces: investigation by telemetry (De Boever et al.), 326
telemetry system to study (McCall et al.), 98
under anesthesia (De Boever et al.), 402

G

Geometry of finishing lines for full crown restorations, analysis of (Pascoe), 157
Geriatric dentistry: problem (Massler), 324
Glass-ionomer cement, Aspa, finished surface texture, abrasion resistance, and porosity of (Smales and Joyce), 549
Gold post and core, cast, and pin-retained composite resin bases: comparative study in strength (Moll et al.), 642
Golden proportion, dental esthetics and (Levin), 244
Groove and ridge direction and cusp height, measurement of, using electrical transducer. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83

H

Habits, parafunctional occlusal, frequency of, compared with incidence of mandibular displacement (Rieder), 75
Hanau articulators, arbitrary reference notch on, anatomic comparison to (Lauciello and Appelbaum), 676
Hard and soft palate, resection of, prosthetic reconstruction following (Aramany and Myers), 174
Height, cusp, and ridge and groove direction, measurement of, using electrical transducer. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Hinge axis, terminal, and pantographics, measurement of cusp height and ridge and groove direction using electrical transducer. Part II (Jaarda et al.), 83
Histologic evaluation of electrosurgery with varying frequency and waveform (Maness et al.), 304
Hollow obturator(s), method of fabricating (Schneider), 351
single-visit, for edentulous patients (Parel and LaFuente), 426
Humans, vital root retention in: preliminary report (Garver et al.), 23
Hydrocolloid, irreversible (alginate) impression material, occlusal registrations using (Scott), 517
unit, emergency (Snyder), 596
Hygiene, oral, effect of, on stomatitis in patients receiving cancer chemotherapy (Lindquist et al.), 312
Hypohidrotic ectodermal dysplasia, X-linked—unusual prosthetic problem (Nortjé et al.), 137

I

Immediate dentures, effects of, on certain structural and perceptual parameters of speech (Chaney et al.), 8
Implant(s) abutment, blade-vent, analysis of stress on fixed partial denture with (Takahashi et al.), 186
prostheses, use of, following radiation therapy (Mirza and Dikshit), 663
vitreous carbon endosseous, instrumentation for placement of (Voss and Grenoble), 567
Impression material, Alginate (irreversible hydrocolloid), occlusal registrations using (Scott), 517
techniques, different, vertical displacement of distal-extension ridges by (Vahidi), 374
Improved design for Thompson dowel semiprecision intracoronal retainer (McLeod), 513
In vitro study of resin-supported internally etched enamel (Espinosa), 526
Index, split mounting, technique for attaching master cast to its (Scandrett and Hanson), 467
Indices, soldering, for fixed prostheses, comparison of accuracy of (Moon et al.), 35
Induced and voluntary Bennett movement, clinical importance of (Tupac), 39
Influence of axiopulpal line angle and proximal retention on fracture strength of amalgam restorations (Amorim et al.), 169
Inlays, simplified porcelain (Brinker), 44
Instrumentation for placement of vitreous carbon endosseous implants (Voss and Grenoble), 567
Integrity, marginal, of amalgam alloys in relation to creep: preliminary report (Jordan et al.), 299
Interim acrylic resin removable partial dentures with clasps, fabrication of (Reitz and Weiner), 686
removable partial dentures, acrylic resin blockout for (Stankewitz), 470
Interpin distance, dentinal crazing and (Khera et al.), 538
Intracoronal pressure during crown cementation (Hoard et al.), 520
retainer, Thompson dowel semiprecision, improved design for (McLeod), 513
Intraoral photographic survey (Kaiser and Walters), 457
Ionomer-glass cement, Aspa, finished surface texture, abrasion resistance, and porosity of (Smales and Joyce), 549
Irreversible hydrocolloid (alginate) impression material, occlusal registrations using (Scott), 517

L

Laboratory procedures for fitting removable partial denture frameworks (Gay), 227
Lapse of time between mixing and loading, effect of, on flow of tissue conditioning materials (Ward), 499
Layered silicone rubber technique for flasking removable partial dentures (Scandrett et al.), 349
Ligament, periodontal, and mucous membrane, viscoelastic properties of (Picton and Wills), 263
Line(s) angle, axiopulpal, and proximal retention, influence of, on fracture strength of amalgam restorations (Amorim et al.), 169
finishing, for full crown restorations, analysis of geometry of (Pascoe), 157
Liner, cavity, for amalgam restorations, cyanoacrylate as (Newman et al.), 422
Loading and mixing, effect of time lapse between, on flow of tissue conditioning materials (Ward), 499
Longitudinal study of overdenture patients, 2-year. Part I: incidence and control of caries on overdenture abutments (Toolson and Smith), 486
Luting cements, clinical solubility and disintegration of, method for assessing (Osborne et al.), 413

M

Mandibular border movements, effects of occlusal therapy on pantographic reproducibility of (Crispin et al.), 29
evaluation of: their character and significance (Lundeen et al.), 442
displacement, incidence of, frequency of parafunctional occlusal habits compared with (Rieder), 75
movements in three dimensions, computer-graphic representation of. Part II: sagittal and frontal planes (Roedema et al.), 385
Marginal integrity of amalgam alloys in relation to creep: preliminary report (Jordan et al.), 299
microleakage in cemented complete crowns (Mondelli et al.), 628
Margins, porcelain, technique for establishing (Toogood and Archibald), 464
Master cast, technique for attaching, to its split mounting index (Scandrett and Hanson), 467
Masticatory system dysfunction, pharmacotherapy of (Jagger), 183
Maxillae, unusually large, tray fabrication for (Kazanoglu), 107
Maxillary complete dentures, retention of, role of saliva in (Kawazoe and Hamada), 131
Maxillofacial prosthetics, education in (Chalian), 579; (Drane), 583; (Laney), 587
Measurement of cusp height and ridge and groove direction using electrical transducer. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Mechanical properties of tissue conditioners. Part I: theoretical considerations, behavioral characteristics, and tensile properties (McCarthy and Moser), 89
Part II: creep characteristics (McCarthy and Moser), 334
Membrane, mucous, and ligament, periodontal, viscoelastic properties of (Picton and Wills), 263
Metal, base-ceramic–, alloys, two, characterization of (Huget et al.), 637
-ceramic crown, new (McLean et al.), 273
pontics for fixed partial dentures, facilitating fabrication of (Kaiser), 591
molds, three-piece, direct wax method of fabrication for (Oral and Zini), 558
Method for assessing clinical solubility and disintegration of luting cements (Osborne et al.), 413
of fabricating hollow obturator (Schneider), 351
Microleakage in amalgam system, effects of burnishing on (Cothren et al.), 163
marginal, in cemented complete crowns (Mondelli et al.), 632
of several amalgam systems: animal study (Andrews and Hembree), 418
Microstructure and abrasive wear of composite resins, relationship between (Draughn and Harrison), 220
and corrosion of Progold (Sarkar et al.), 50
Mirror system for profile photography (Brodbelt), 573
Mixing and loading, effect of time lapse between, on flow of tissue conditioning materials (Ward), 499
Modifying tray materials to improve working qualities (von Krammer K.), 472
Mold(s), metal, three-piece, direct wax method of fabrication for (Oral and Zini), 558
technique, universal simplified, for construction of facial prostheses (Zini et al.), 56
Mounting index, split, technique for attaching master cast to its (Scandrett and Hanson), 467
Mouth syndrome, denture sore, etiologic factors in (Nater et al.), 367
Movement(s), Bennett, voluntary and induced, clinical importance of (Tupac), 39

Movements—Cont'd
mandibular border, effects of occlusal therapy on pantographic reproducibility of (Crispin et al.), 29
evaluation of: their character and significance (Lundeen et al.), 442
in three dimensions, computer-graphic representation of, Part II: sagittal and frontal planes (Roedema et al.), 385
Mucosal coverage of roots as preventive prosthodontics (Welker et al.), 619
Mucous membrane and ligament, periodontal, viscoelastic properties of (Picton and Wills), 263
Multiview method for showing patient casts on slides (Murrey), 109
Myofascial pain-dysfunction syndrome (Nel), 438
selective tomography of TMJ and (Rozencweig and Martin), 67

N

Neuropathologic chewing, use of tongue-depressing stents for (Jackson), 309
New metal-ceramic crown (McLean et al.), 273
semiadjustable articulator. Part IV: investigation of three semiadjustable articulators (Tanaka and Finger), 288
News and notes, 116, 238, 357, 480, 604, 717
Notch, arbitrary reference, on Hanau articulators, anatomic comparison to (Lauciello and Appelbaum), 676
Nutrition—phase one of edentulous patient (Barone), 122

O

Obturator(s) design, basic principles of, for partially edentulous patients. Part I: classification (Aramany), 554
Part II: design principles (Aramany), 656
hollow, method of fabricating (Schneider), 351
single-visit hollow, for edentulous patients (Parel and LaFuente), 426
Occlusal forces, functional: investigation by telemetry (De Boever et al.), 326
telemetry system to study (McCall et al.), 98
under anesthesia (De Boever et al.), 402
habits, parafunctional, frequency of, compared with incidence of mandibular displacement (Rieder), 75
registrations using alginate (irreversible hydrocolloid) impression material (Scott), 517
splints, effect of, on TMJ symptomatology (Carraro and Caffessee), 563
fabrication (Kass and Tregaskes), 461
therapy, effects of, on pantographic reproducibility of mandibular border movements (Crispin et al.), 29
Occlusion(s), denture, swallowing and (Laird), 614
posterior denture, photoelastic comparison of (Lopuck et al.), 18
Oral hygiene, effect of, on stomatitis in patients receiving cancer chemotherapy (Lindquist et al.), 312
Orbital prostheses, construction of, using silicone pattern technique (Oral et al.), 430
Overdenture(s) abutment(s), incidence and control of caries on, 2-year longitudinal study of overdenture patients. Part I (Toolson and Smith), 486
stress in (White), 13
alveolar bone loss in: 5-year study (Crum and Rooney), 610
patients, 2-year longitudinal study of. Part I: incidence and control of caries on overdenture abutments (Toolson and Smith), 486
tissue response to (Fenton and Hahn), 492

P

Pain(s)-dysfunction syndrome, myofascial (Nel), 438
selective tomography of TMJ and (Rozencweig and Martin), 67
Pain—Cont'd
facial, and anxiety levels: considerations for treatment (Marbach et al.), 434
Palate, hard and soft, resection of, prosthetic reconstruction following (Aramany and Myers), 174
Pantographic(s) reproducibility of mandibular border movements, effects of occlusal therapy on (Crispin et al.), 29
and terminal hinge axis, measurement of cusp height and ridge and groove direction using electrical transducer. Part II (Jaarda et al.), 83
Papillary atrophy, central, of tongue, and denture stomatitis (Farman et al.), 253
Parafunctional occlusal habits, frequency of, compared with incidence of mandibular displacement (Rieder), 75
Parameters of speech, certain structural and perceptual, effects of immediate dentures on (Chaney et al.), 8
Partial denture(s) abutments, removable, visualization of stress and strain related to (White), 143
with clasps, acrylic resin, interim, fabrication of (Reitz and Weiner), 686
fixed, with blade-vent implant abutment, analysis of stress on (Takahashi et al.), 186
facilitating fabrication of ceramic-metal pontics for (Kaiser), 591
and removable correction of prognathism with (Boyd), 509
frameworks, removable, laboratory procedures for fitting (Gay), 227
removable, abutments for, technique for restoring (Teppo and Smith), 398
combinations of diverse retainers in (Langer), 378
interim, acrylic resin blockout for (Stankewitz), 470
layered silicone rubber technique for flasking (Scandrett et al.), 349
conventional, service, swing-lock partial denture: alternative approach to (Antos et al.), 257
swing-lock: alternative approach to conventional removable partial denture service (Antos et al.), 257
or full coverage restorations: survey of prevailing criteria (Grosso and Carreno), 628
Patient(s) casts on slides, multiview method for showing (Murrey), 109
complete denture, self-administered questionnaire—aid in managing (Nassif), 363
edentulous, phase one of —nutrition (Barone), 122
single-visit hollow obturators for (Parel and LaFuente), 426
overdenture, 2-year longitudinal study of. Part I: incidence and control of caries on overdenture abutments (Toolson and Smith), 486
partially edentulous, basic principles of obturator design for, Part I: classification (Aramany), 554
Part II: design principles (Aramany), 656
receiving cancer chemotherapy, effect of oral hygiene on stomatitis in (Lindquist et al.), 312
Pattern technique, direct, for posts and cores (Miller), 392
T-pins in (Ram), 103
silicone, construction of orbital prostheses using (Oral et al.), 430
Perceptual and structural parameters of speech, effects of immediate dentures on (Chaney et al.), 8
Performance criteria in preclinical denture prosthodontics (Razzoog et al.), 576
Periodontal ligament and mucous membrane, viscoelastic properties of (Picton and Wills), 263
Pharmacotherapy of masticatory system dysfunction (Jagger), 183
Phosphate, zinc, cements, mixed on room temperature and frozen slabs, comparison of properties for (Myers et al.), 409

Photoelastic comparison of posterior denture occlusions (Lopuck et al.), 18
Photographic survey, intraoral (Kaiser and Walters), 457
Photography, profile, mirror system for (Brodbelt), 573
Pin(s), proposed retentive (Chan), 166
-retained and cast gold post and core composite resin bases: comparative study in strength (Moll et al.), 642
T-, in direct pattern technique for posts and cores (Ram), 103
Pivots, treatment of TMJ syndrome by (Lous), 179
Planes, sagittal and frontal, computer-graphic representation of mandibular movements in three dimensions. Part II: (Roedema et al.), 385
Pontics, ceramic-metal, for fixed partial dentures, facilitating fabrication of (Kaiser), 591
Porcelain inlays, simplified (Brinker), 44
margins, technique for establishing (Toogood and Archibald), 464
Porosity, surface texture, and abrasion resistance, finished, of Aspa glass-ionomer cement (Smales and Joyce), 549
Post(s) and core(s), cast gold, and pin-retained composite resin bases: comparative study in strength (Moll et al.), 642
direct pattern technique for (Miller), 392
T-pins in direct pattern technique for (Ram), 103
Posterior denture occlusions, photoelastic comparison of (Lopuck et al.), 18
Preclinical denture prosthodontics, performance criteria in (Razzoog et al.), 576
Pressure, intracoronal, during crown cementation (Hoard et al.), 520
Pressuring techniques and cement thickness for cast restorations (Koyano et al.), 544
Preventive prosthodontics—Mucosal coverage of roots (Welker et al.), 619
Profile photography, mirror system for (Brodbelt), 573
Prognathism, correction of, with fixed and removable partial dentures (Boyd), 509
Progold, corrosion and microstructure of (Sarkar et al.), 50
Proportion, golden, dental esthetics and (Levinn), 244
Proposed retentive pin (Chan), 166
Prostheses, conditioning, viewed from standpoint of speech adaptation (Hamlet et al.), 60
facial, universal simplified mold technique for construction of (Zini et al.), 56
fixed, soldering indices for, comparison of (Moon et al.), 35
implant, use of, following radiation therapy (Mirza and Dikshit), 663
orbital, construction of, using silicone pattern technique (Oral et al.), 430
fabrication, cranioplasty, technique for (Jordan et al.), 230
Prosthetic(s), maxillofacial, education in (Chalian), 579; (Drane), 583; (Laney), 587
problem, unusual, X-linked hypohidrotic ectodermal dysplasia (Nortjé et al.), 137
reconstruction following resection of hard and soft palate (Aramany and Myers), 174
Prosthodontics, American Board of (Brown), 689
denture, preclinical, performance criteria in (Razzoog et al.), 576
Prosthodontics, preventive—Mucosal coverage of roots (Welker et al.), 619
Proximal retention and axiopulpal line angle, influence of, on fracture strength of amalgam restorations (Amorim et al.), 169

Q

Quantitative assessment of sealant wear in vivo (Handelman et al.), 531
Questionnaire, self-administered—aid in managing complete denture patients (Nassif), 363

R

Radiation therapy, use of implant prostheses following (Mirza and Dikshit), 663
Radiographs, TMJ, evaluation of asymmetry in (Weinberg), 315
Readers' round table, 110, 353, 475, 599
Reconstruction, prosthetic, following resection of hard and soft palate (Aramany and Myers), 174
Reference notch, arbitrary, on Hanau articulators, anatomic comparison to (Lauciello and Appelbaum), 676
Registrations, occlusal, using alginate (irreversible hydrocolloid) impression material (Scott), 517
Relationship between abrasive wear and microstructure of composite resins (Draughn and Harrison), 220
Removable and fixed partial dentures, correction of prognathism with (Boyd), 509
partial denture(s), abutments for, technique for restoring (Teppo and Smith), 398
visualization of stress and strain related to (White), 143
combinations of diverse retainers in (Langer), 378
frameworks, laboratory procedures for fitting (Gay), 227
interim, acrylic resin blockout for (Stankewitz), 470
layered silicone rubber technique for flasking (Scandrett et al.), 349
service, conventional, swing-lock partial denture: alternative approach to (Antos et al.), 257
Report of Committee on Scientific Investigation of American Academy of Restorative Dentistry (Gilmore et al.), 192
Representation, computer-graphic, of mandibular movements in three dimensions. Part II: sagittal and frontal planes (Roedema et al.), 385
Reproducibility, pantographic, of mandibular border movements, effects of occlusal therapy on (Crispin et al.), 29
Resection of hard and soft palate, prosthetic reconstruction following (Aramany and Myers), 174
Resin(s), acrylic, blockout, for interim removable partial dentures (Stankewitz), 470
denture base, coloring (Winkler and Vernon), 4
removable partial dentures with clasps, interim, fabrication of, (Reitz and Weiner), 686
bases, composite cast gold post and core and pin-retained: comparative study in strength (Moll et al.), 642
composite, relationship between abrasive wear and microstructure of (Draughn and Harrison), 220
-supported internally etched enamel, in vitro study of (Espinosa), 526
Rest vertical dimension determined by electromyography with biofeedback as compared to conventional methods (Feldman et al.), 216
Restorations, amalgam, cyanoacrylate as cavity liner for (Newman et al.), 422
fracture strength of, influence of axiopulpal line angle and proximal retention on (Amorim et al.), 169
cast, pressuring techniques and cement thickness for (Koyano et al.), 544
full crown, analysis of geometry of finishing lines for (Pascoe), 157
partial or full coverage: survey of prevailing criteria (Grosso and Carreno), 628
Restorative and endodontic treatment considerations, combined (Waliszewski and Sabala), 152
Restoring abutments for removable partial dentures, technique for (Teppo and Smith), 398
Retainer(s), combinations of, in removable partial dentures (Langer), 378
Thompson dowel semiprecision intracoronal, improved design for (McLeod), 513
Retention of maxillary complete dentures, role of saliva in (Kawazoe and Hamada), 131

Retention—Cont'd
proximal, and axiopulpal line angle, influence of, on fracture strength of amalgam restorations (Amorim et al.), 169
vital root, in humans: preliminary report (Garver et al.), 23
Retentive pin, proposed (Chan), 166
Ridge(s) augmentation, alveolar, with tricalcium phosphate (Nery et al.), 668
distal-extension, vertical displacement of, by different impression techniques (Vahidi), 374
and groove direction and cusp height, measurement of, using electrical transducer. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Role of saliva in retentin of maxillary complete dentures (Kawazoe and Hamada), 131
Room temperature and frozen slabs, comparison of properties for zinc phosphate cements mixed on (Myers et al.), 409
Root(s), mucosal coverage of, as preventive prosthodontics (Welker et al.), 619
retention, vital, in humans: preliminary report (Garver et al.), 23
Rubber technique, layered silicone, for flasking removable partial dentures (Scandrett et al.), 349

S

Sagittal and frontal planes, computer-graphic representation of mandibular movements in three dimensions. Part II: (Roedema et al.), 385
Saliva, role of, in retention of maxillary complete dentures (Kawazoe and Hamada), 131
Sealant wear in vivo, quantitative assessment of (Handelman et al.), 531
Selective tomography of TMJ and myofacial pain-dysfunction syndrome (Rozencweig and Martin), 67
Self-administered questionnaire—aid in managing complete denture patients (Nassif), 363
Semiadjustable articulator, new. Part IV: investigation of three semiadjustable articulators (Tanaka and Finger), 288
Semiprecision intracoronal retainer, Thompson dowel, improved design for (McLeod), 513
Silicone pattern technique, construction of orbital prostheses using (Oral et al.), 430
rubber technique, layered, for flasking removable partial dentures (Scandrett et al.), 349
Simplified mold technique, universal, for construction of facial prostheses (Zini et al.), 56
porcelain inlays (Brinker), 44
Single-visit hollow obturators for edentulous patients (Parel and LaFuente), 426
Slabs, room temperature and frozen, comparison of properties for zinc phosphate cements mixed on (Myers et al.), 409
Slides, multiview method for showing patient casts on (Murrey), 109
Soft and hard palate, resection of, prosthetic reconstruction following (Aramany and Myers), 174
Soldering indices for fixed prostheses, comparison of accuracy of (Moon et al.), 35
Solubility, cement, clinical evaluation of (Mitchem and Gronas), 453
and disintegration, clinical, of luting cements, method for assessing (Osborne et al.), 413
Sore mouth syndrome, denture, etiologic factors in (Nater et al.), 367
Speech adaptation, conditioning prostheses viewed from standpoint of (Hamlet et al.), 60
certain structural and perceptual parameters of, effects of immediate dentures on (Chaney et al.), 8
Splint(s), occlusal, effect of, on TMJ symptomatology (Carraro and Caffessee), 563
fabrication of (Kass and Tregaskes), 461
Split mounting index, technique for attaching master cast to its (Scandrett and Hanson), 467
Stents, tongue-depressing, use of, for neuropathologic chewing (Jackson), 309
Stomatitis, denture, antimycotic denture adhesive in treatment of (Scher et al.), 622
central papillary atrophy of tongue and (Farman et al.), 253
in patients receiving cancer chemotherapy, effect of oral hygiene on (Lindquist et al.), 312
Stomatotoxic manifestations of cancer chemotherapy (Dreizen), 650
Strain and stress related to removable partial denture abutments, visualization of (White), 143
Strength, bond, of three cements determined by centrifugal testing (Arfaei and Asgar), 294
fracture, of amalgam restorations, influence of axiopulpal line angle and proximal retention on (Amorim et al.), 169
Stress, abutment, in overdentures (White), 13
on fixed partial denture with blade-vent implant abutment, analysis of (Takahashi et al.), 186
and strain related to removable partial denture abutments, visualization of (White), 143
Structural and perceptual parameters of speech effects of immediate dentures on (Chaney et al.), 8
Survey, intraoral photographic (Kaiser and Walters), 457
Swallowing and denture occlusion (Laird), 614
Swing-lock partial denture: alternative approach to conventional removable partial denture service (Antos et al.), 257
Syndrome, denture sore mouth, etiologic factors in (Nater et al.), 367
myofascial pain-dysfunction (Nel), 438
selective tomography of TMJ and (Rozencweig and Martin), 67
TMJ, treatment of, by pivots (Lous), 179

T

T-Pins in direct pattern technique for posts and cores (Ram), 103
Technique for attaching master cast to its split mounting index (Scandrett and Hanson), 467
for cranioplasty prosthesis fabrication (Jordan et al.), 230
direct pattern, for posts and cores, T-pins in (Ram), 103
for establishing porcelain margins (Toogood and Archibald), 464
for restoring abutments for removable partial dentures (Teppo and Smith), 398
Telemetry, investigation by, functional occlusal forces (De Boever et al.), 326
system to study functional occlusal forces (McCall et al.), 98
Temperature, room, and frozen slabs, comparison of properties for zinc phosphate cements mixed on (Myers et al.), 409
Temporomandibular joint(s) radiographs, evaluaion of asymmetry in (Weinberg), 315
selective tomography of, and myofacial pain-dysfunction syndrome (Rozencweig and Martin), 67
symptomatology, effect of occlusal splints on (Carraro and Caffessee), 563
syndrome, treatment of, by pivots (Lous), 179
Tensile force and dowel form (Johnson and Sakumura), 645
properties. Theoretical considerations, and behavioral characteristics, mechanical properties of tissue conditioners. Part I (McCarthy and Moser), 89
Terminal hinge axis and pantographics, measurement of cusp height and ridge and groove direction using electrical transducer. Part II (Jaarda et al.), 83
Testing, centrifugal, bond strength of three cements determined by (Arfaei and Asgar), 294

Texture, surface, abrasion resistance, and porosity, finished, of Aspa glass-ionomer cement (Smales and Joyce), 549
Therapy, occlusal, effects of, on pantographic reproducibility of mandibular border movements (Crispin et al.), 29
radiation, use of implant prostheses following (Mirza and Dikshit),
Thompson dowel semiprecision intracoronal retainer, improved design for (McLeod), 513
Through eyes of editor (Section editors), 1, 119, 241, 359, 483, 607
Time lapse between mixing and loading, effect of, on flow of tissue conditioning materials (Ward), 499
Tissue conditioners, mechanical properties of. Part I: theoretical considerations, behavioral characteristics, and tensile properties (McCarthy and Moser), 89
Part II: creep characteristics (McCarthy and Moser), 334
conditioning materials, chairside modifications of dentures for (Bauman), 225
flow of, effect of time lapse between mixing and loading on (Ward), 499
response to overdentures (Fenton and Hahn), 492
Tomography, selective, of TMJ, and myofacial pain-dysfunction syndrome (Rozencweig and Martin), 67
Tongue, central papillary atrophy of, and denture stomatitis (Farman et al.), 253
-depressing stents, use of, for neuropathologic chewing (Jackson), 309
Tooth selection, denture esthetics is more than (Tautin), 127
Transducer, electrical, measurement of cusp height and ridge and groove direction using. Part II: pantographics and terminal hinge axis (Jaarda et al.), 83
Transitional denture technique (Chalifoux), 682
immediate complete denture (McCartney), 593
Tray fabrication for unusually large maxillae (Kazanoglu), 107
materials, modifying, to improve working qualities (von Krammer K.), 472
Treatment of TMJ syndrome by pivots (Lous), 179
Tricalcium phosphate ceramic, alveolar ridge augmentation with (Nery et al.),
2-Year longitudinal study of overdenture patients. Part I: incidence and control of caries on overdenture abutments (Toolson and Smith), 486

U

Universal simplified mold technique for construction of facial prostheses (Zini et al.), 56
Use of implant prostheses following radiation therapy (Mirza and Dikshit), 663
Use—Cont'd
of tongue-depressing stents for neuropathologic chewing (Jackson), 309

V

Varnish, cavity, and its application: 'once is not enough' (Lund et al.), 534
Vent-blade implant abutment, analysis of stress on fixed partial denture with, (Takahashi et al.), 186
Vertical dimension, rest, determined by electromyography with biofeedback as compared with conventional methods (Feldman et al.), 216
displacement of distal-extension ridges by different impression techniques (Vahidi), 374
Viscoelastic properties of periodontal ligament and mucous membrane (Picton and Willis), 263
Visualization of stress and strain related to removable partial denture abutments (White), 143
Vital root retention in humans: preliminary report (Garver et al.), 23
Vitreous carbon endosseous implants, instrumentation for placement of (Voss and Grenoble), 567
Voluntary and indiced Bennett movement, clinical importance of (Tupac), 39

W

Waveform and frequency, varying, histologic evaluation of electrosurgery with (Maness et al.), 304
Wax contouring, basic, for complete dentures (Renner and Blakeslee), 343
method, direct, for fabrication of three-piece metal molds (Oral and Zini), 558
Wear, abrasive, and microstructure of composite resins, relationship between (Draughn and Harrison), 220
of sealant, in vivo, quantitative assessment of (Handelman et al.), 531
Working qualities, modifying tray materials to improve (von Krammer K.), 472

X

X-linked hypohidrotic ectodermal dysplasia—unusual prosthetic problem (Nortjé et al.), 137

Z

Zinc phosphate cements mixed on room temperature and frozen slabs, comparison of properties for (Myers et al.), 409
